the content of this product or its components are transferred to the user.
Disassembly or reverse compilation of this product is expressly prohibited.

Installation

Windows

To Install:

1. Insert the DVD.
   If installation doesn't start automatically, open the DVD using your 'My Computer' desktop shortcut. Right Click on the DVD drive and select "Explore."
2. Double click on "Setup.exe."
3. Follow the steps to install the application on your computer. You will need to select 'I accept the terms in the license agreement' in order to proceed through the installation process.
   NOTE: You must have 'administrative privileges' on the computer on which you are trying to install the software or the installation process will not be able to proceed.
4. A shortcut will be installed on your desktop during the installation steps.
5. Double click on the desktop shortcut to launch the application.

MAC

To Install:

1. Insert the DVD.
2. Double click on DVD drive icon.
3. Drag the Taunton Press icon into the Applications folder to install the application on your computer.
4. Click on the Taunton Press icon.

800-477-8727 (9AM-5PM Eastern) - from the US and Canada
203-426-8171 - International (leave a message to receive a callback)

The Taunton Guarantee: At The Taunton Press, your satisfaction is of the utmost importance to us. If at any time you are not completely satisfied with your DVD, you may return it and we'll immediately refund your payment in full. No questions asked.

Navigation and Shortcuts

To navigate quickly to certain pages from an article without having to perform excessive scrolling, use the navigation box at the bottom of the screen. While in an issue, enter the page number you wish to navigate to and click Go or press enter.

Home: Clicking on the home button takes you back to the main menu. (Clicking on the logo at the top right or Home icon in the tool bar also brings you to the main menu.)

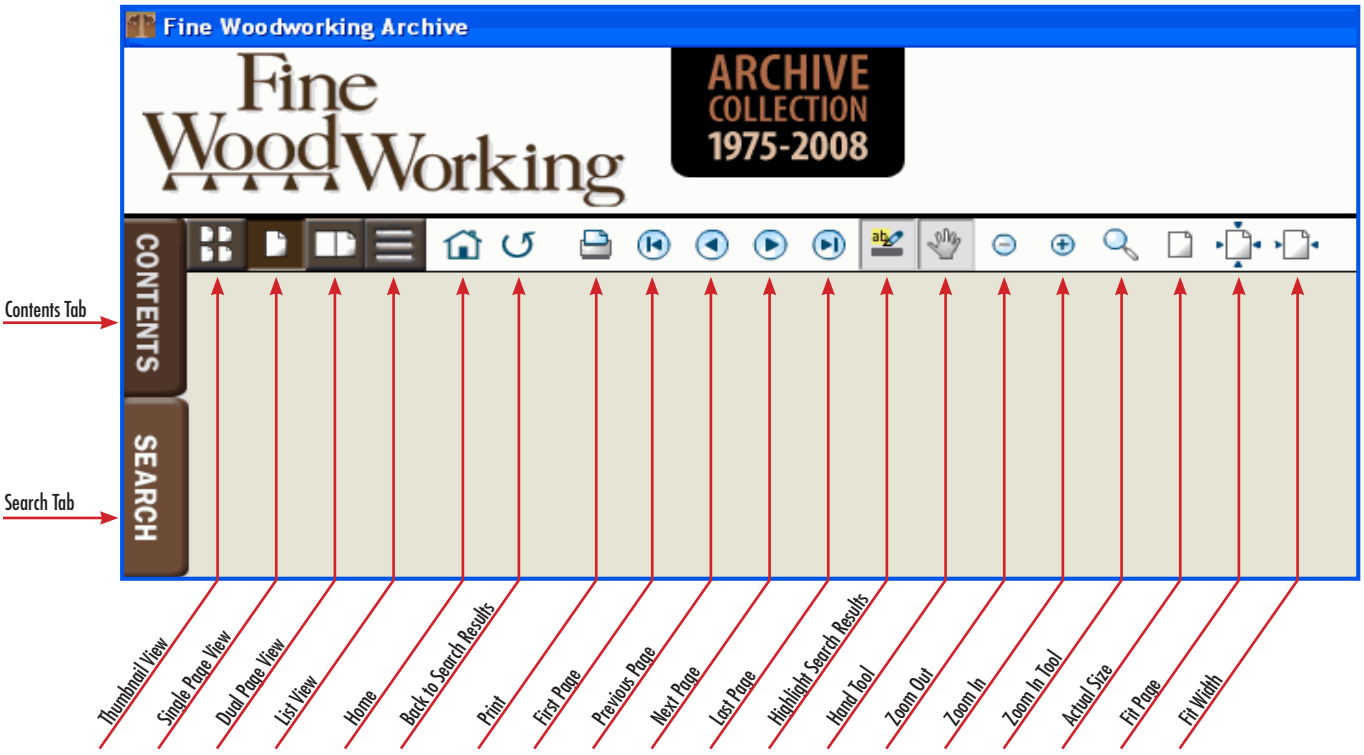

About: Clicking on this button opens an informational window about this DVD. ABOUT

Safety: Clicking on the SAFETY button opens a note from our editor about woodworking safety.

Help: HELP opens a window that explains how the DVD works and how to use it. Within the help window, selecting a bookmark on the left directly shows the correspondent content on the right.

Navigation tips:

- Click on the various icons at the top right and left of the screen to navigate around your searches.
- Hover your mouse over the icons for a description of what they do.
- Note that navigation options are dependent on the screen you are in (Main Menu, Control Panel).

Printing

This DVD provides the ability to print to a printer installed on your machine. To do this, simply click the Printer icon  while viewing any article.

Single page

In the single-page view  , the Printing Wizard will open with listed print options. You can select to print:

- All—all pages of selected issue
- Pages—a range of pages (ex: 1-10) or a single page (10)

Double page

In the double-page view  , the Printing Wizard will not open. The software will automatically print the current two pages.

PostScript printers only:

Please make sure you have the correct and most recent PostScript driver installed on your system. In rare cases, the print function will not work correctly if an incorrect or outdated driver is installed. Please contact your printer manufacturer to obtain the correct printer driver.

Main Menu

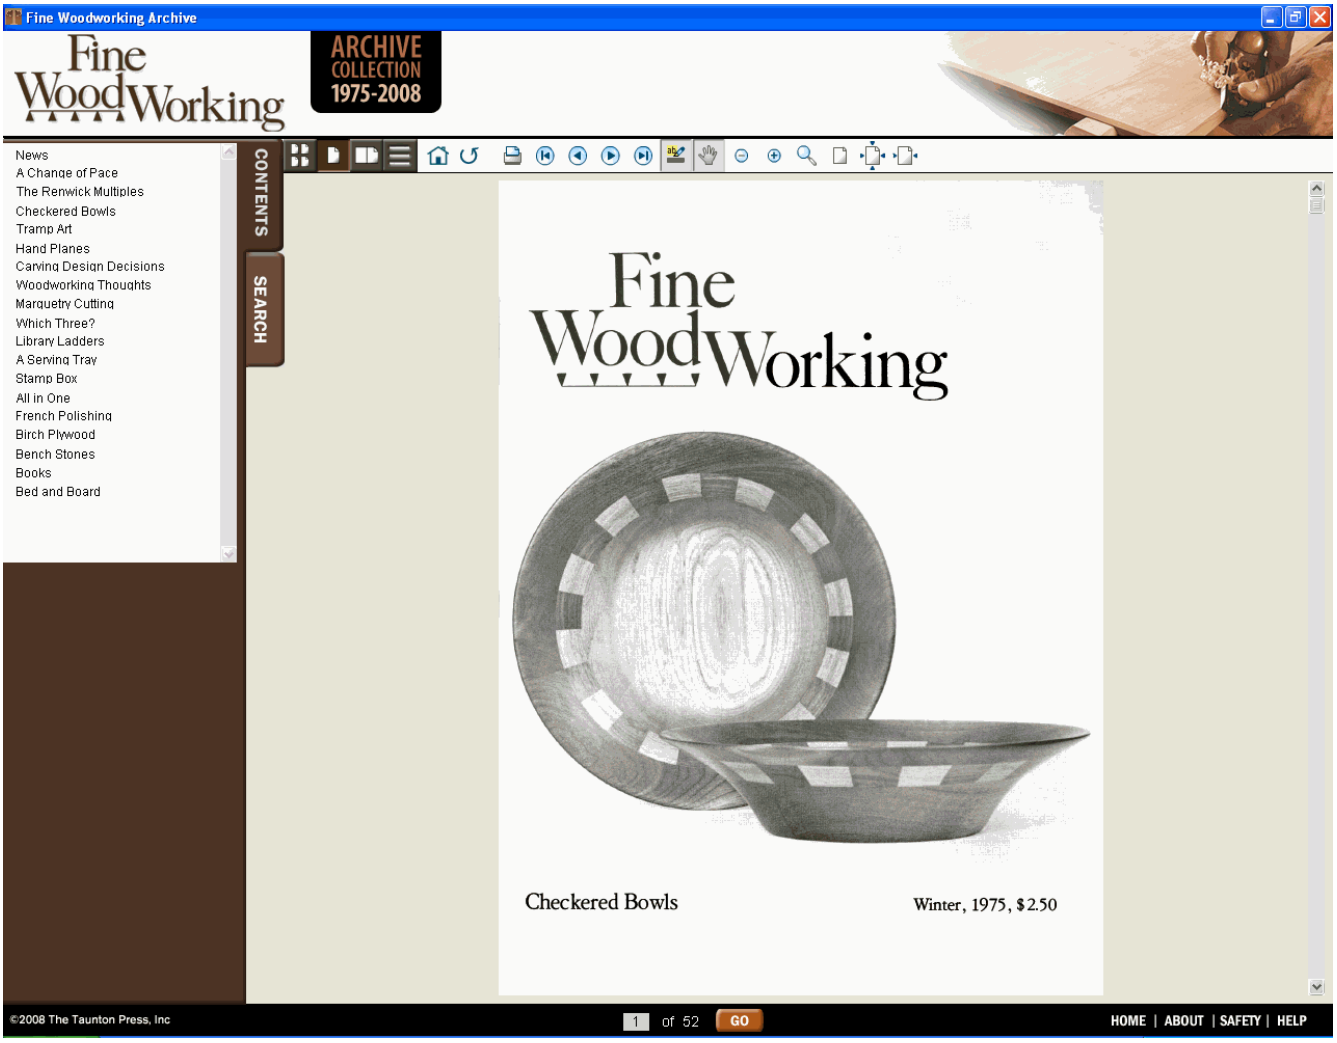

This is the home page for the *Fine Woodworking* Archive DVD. The main menu of the magazine archive works very much like a search engine. It allows you to browse and search through 201 issues of *Fine Woodworking* magazine for articles on specific topics such as wood turning, furniture building or special tools.

To search, click on the Search tab on the left hand side of the screen (for more information on the search panel, see page 8). Or, to browse, highlight any issue by single-clicking. Press theThumbnail View button to browse page thumbnails of the issue. Press the Single Page View to browse in full single page mode. Press the Double Page View to browse in double page mode. Press the List View to see list of all the content related to that issue.

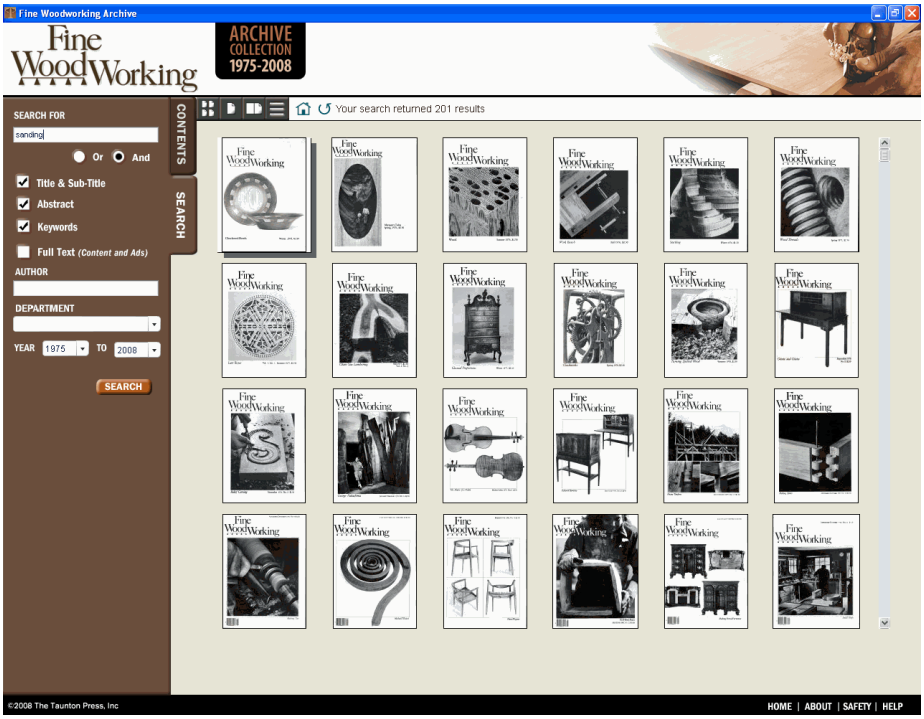

Contents Panel

The Contents Panel exists to provide an easy way to navigate through the issues on this DVD. To use the Contents Panel for any issue, simply double-click to open an issue from the Main Menu and then click on the Contents tab on the left. This is a basic listing of the contents of the issue. For a more detailed list of contents, click on the list view button. Click on an article title in the contents tab to view the desired article.

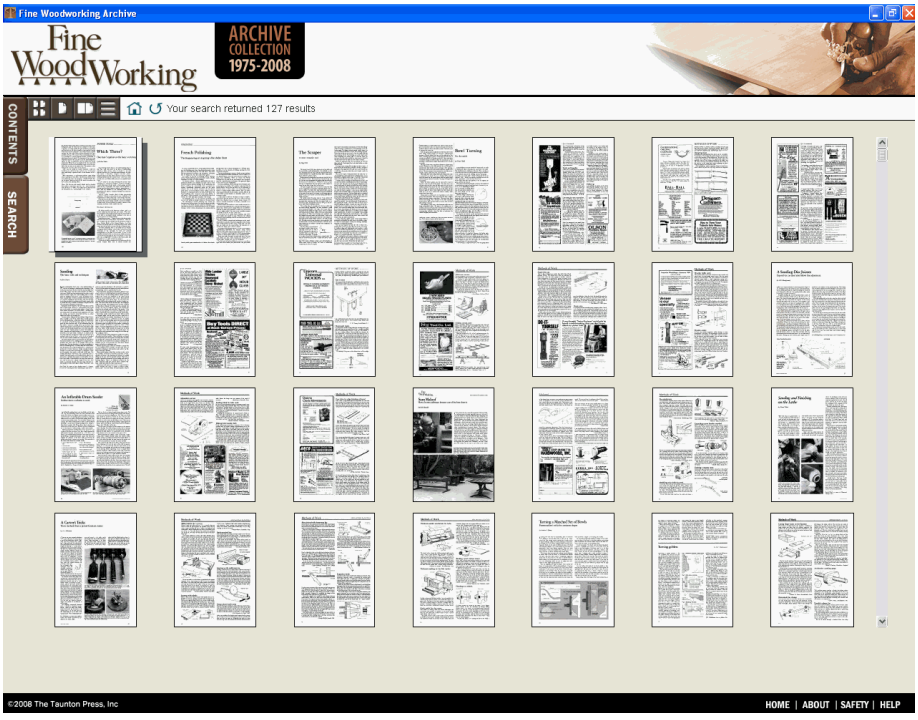

Search Panel

Enter a keyword in the “search for” line at the top of the panel, and then click the search button. By default, the software will search for keywords in Title, Sub-Title, Abstract, and Keywords fields in all departments and years with the ‘AND’ qualifier chosen. See Advanced Search on page 10 for more details.

In the example below, the search resulted in 127 results. Double-click on an article to open in full single page view.

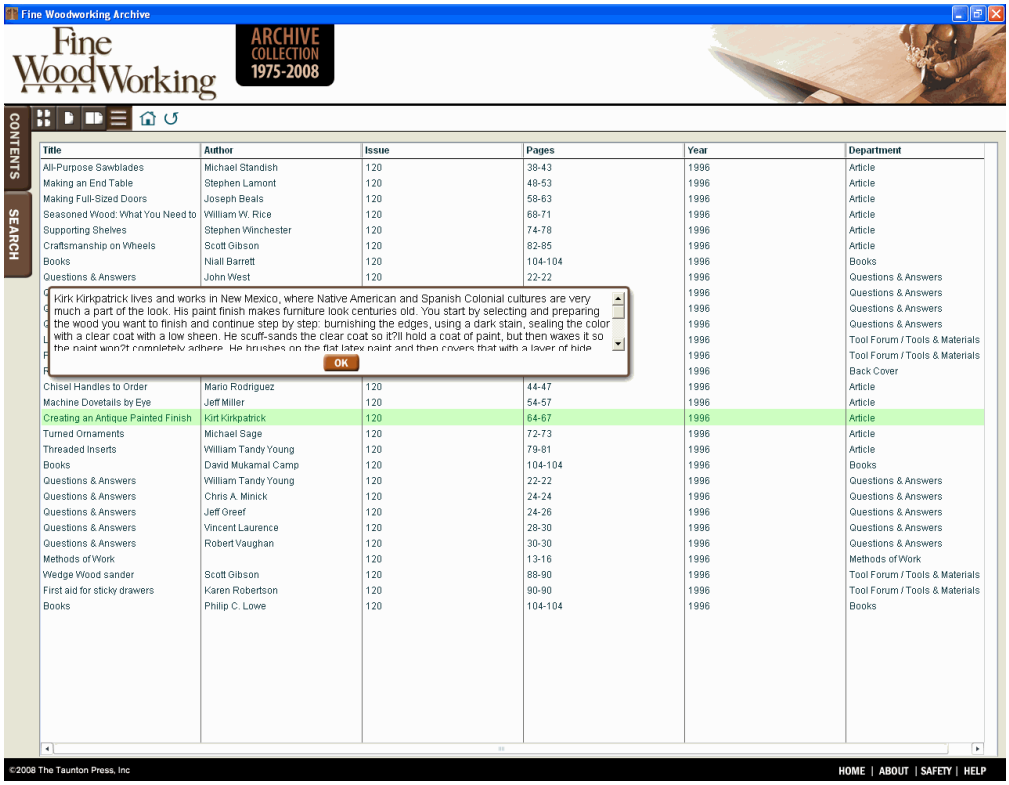

Search Results List View

Click on the list button  at the top of the screen to see a “list view” of the articles found.

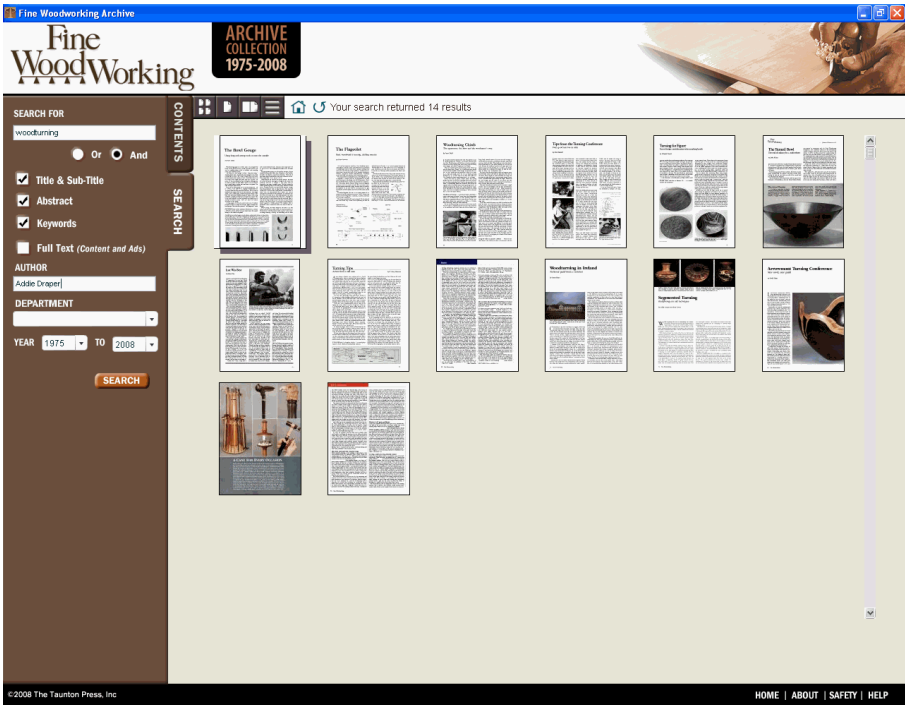

Single-click on the desired article to view an Abstract. Double-Click to open the article.
*Please note that not all articles include Abstract information.

Advanced Search

On the “Search” tab you can choose to search by author, department, and/or year. Again, enter one keyword, AND an author name (if you know who you’re looking for) and click the search button.

Search Options

Refine your search by clicking on any of the following options:

- Check  to have your keyword search the Title & Sub-Title information of every article
- Check  to have your keyword search the Abstract information
- Check  to have your keyword search the Taxonomy information
- Check  to have your keyword search all the text

* Please note that the ‘Full Text’ search does not include advanced search options.

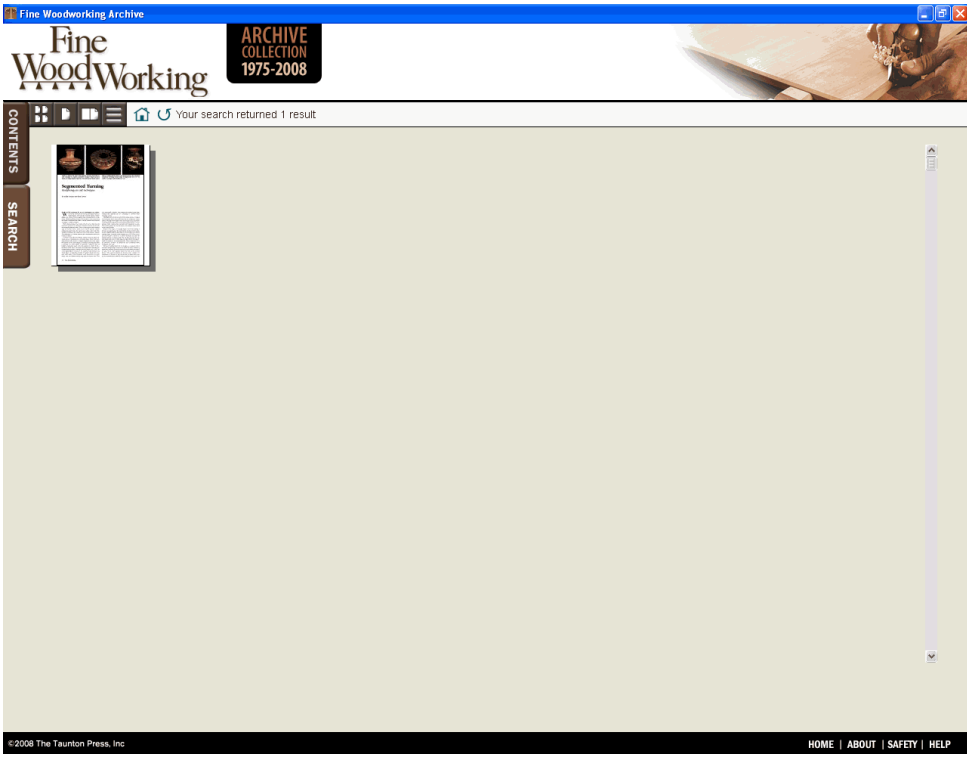

* Search speeds may vary based on the complexity of a search and the CPU speed.

Search tips:

Results may vary depending on spelling. In particular, on whether or not you use singular versus plural words. If you don’t see what you’re searching for, modify the search term. Also, it’s important to spell words correctly as this search does not have a thesaurus function. For example, typing “tablesaw” or “bandsaw” will yield more relevant results than “table saw” or “band saw.”

Advanced Search Results

This screen shows the result of the advanced search on page 10. Because we searched for a specific topic AND the author, we got just the result we were looking for.

Click on the single page view button  at the top of the screen to see the full first page of an article
